

NEURIPS 2026 · WORKSHOP

SocialAgent: Second Workshop on Large Language Models for Social Reasoning and Simulation

Atlanta, Georgia, USA · December 12 or 13, 2026 (Exact Date TBA)

Overview

Large language models are increasingly used not only as analytic tools, but as socially situated agents that reason, interact, and generate behavior in simulated environments. This shift enables new forms of research on decision-making, social norms, cooperation, persuasion, and collective dynamics at scale.

SocialAgent brings together researchers who build, evaluate, and critically examine LLM-based social agents. The workshop aims to advance a principled, responsible, and empirically grounded research agenda for social reasoning and simulation.

Workshop Themes

🧠 **Social reasoning & cognition:** Theory of mind, moral judgment, and genuine reasoning vs. prompting artifacts.

🌐 **Social simulation & its validity:** LLMs as proxies for individuals and populations, and the validity standards that make simulations trustworthy.

⚖️ **Pluralistic alignment & evaluation:** Contested values, emergent norms, and evaluation beyond task accuracy.

Call for Papers [Submit on OpenReview ↗](#)

We welcome empirical, methodological, theoretical, and conceptual submissions. Topics include, but are not limited to:

- **Agent-Based Social Simulation with LLMs:** Coordination, conflict, cooperation, collective action, and information diffusion.
- **Emergence, Norm Formation, and Cultural Evolution:** The development of norms, beliefs, narratives, and collective behavior.
- **Persona Fidelity and Population Heterogeneity:** Psychologically plausible agents, synthetic populations, and demographic variation.

- **Interventions and Counterfactual Experiments:** Simulations for policy, system design, and stress testing.
- **Grounding, Realism, and Evaluation:** Calibration, reproducibility, privacy, and comparisons with human behavior.
- **Ethical and Societal Implications:** Validity limits, misuse risks, and responsible applications in sensitive domains.

Submission Types and Guidelines

- **Long Paper (Non-Archival):** May consist of up to 9 pages of content, plus unlimited pages for references and appendix.
- **Short / Position / Abstract Papers (Non-Archival):** May consist of up to 4 pages of

SocialAgent @ NeurIPS 2026

Social Agents Workshop Series

SocialLLM @ ICWSM 2026

Tutorial @ ICWSM 2026

- **At least one author of each accepted paper should register and present their work in person at SocialAgent.**

Important Dates

Submission Deadline	August 25, 2026, AoE
Author Notification	September 29, 2026, AoE
Workshop Date	December 12 and December 13, 2026, Atlanta TBD

Call for Reviewers

[Volunteer to Review](#) ↗

We invite researchers working on large language models, social reasoning, agent-based simulation, and related areas to join our reviewer pool.

Schedule

The workshop schedule will be announced.

Keynote Speakers

Serina Chang

UC Berkeley

Afra Mashhadi

University of Washington

Organizers

Xiangjue Dong

TAMU & Microsoft

Jiseon Kim

Vector Institute

Yunah Jang

Seoul National
University

Tim G. J. Rudner

University of Toronto
& Vector Institute

Alice Oh

KAIST

Technical Support

Siqi Zhang

Microsoft

Accepted Papers

Accepted papers will be posted after the review process.
